

IN THE CLAIMS:

Cancel claim 7 without prejudice.

Amend the following claims:

Sub 1. 1. (Amended) A hollow plastic section, comprising:
a frame section defining a longitudinal axis and having an interior subdivided in several inner chambers by a plurality of partition walls extending in a direction of the longitudinal axis; and
a plurality of stiffening elements received in the interior separate from one another, without interconnection, for realizing a reinforcement of the frame section, wherein each of the stiffening elements has a rectangular cross section and is secured directly to the frame section.

Sub 6. 6. (Amended) The hollow plastic section of claim 4, wherein the means for effecting a positive fit includes one of roughening, knurling, and punching of the member.

VERSION WITH MARKINGS TO SHOW CHANGES MADE:
